Los Romanes

House

3

1

120 m2

This property is located in the countryside of Los Romanes, only a short drive to the village. The property is unfinished so gives the potential buyer plenty of scope to put their personal touch. There is plenty of flat land and the views are quite spectacular. The access is very good and it is less than 100 meters above the lake. There is mains water on the plot and running water in the house, also there is a septic tank installed. There is the possibility to build on top of the bathroom as this is only one storey high. Great access and spectacular views
